[illegible]

7. The motor fuel composition of claim 1, wherein the oxygen-containing organic compounds are linear or sparsely branched.

8. The motor fuel composition of claim 1, wherein the oxygen-containing organic component is present in an amount from about 5% to 100%, based on a total volume of the motor fuel composition, and the hydrocarbon component is present in an amount from 0 to about 95%, based on the total volume of the motor fuel composition.

9. The motor fuel composition of claim 1, wherein the oxygen-containing component comprises (i) an alcohol, (ii) an ether, (iii) an organic ester and (iv) at least one of an aldehyde, a ketone, an inorganic ester, an acetal, an epoxide and a peroxide.

10. The motor fuel composition of claim 9, wherein the oxygen-containing component comprises (i) an alcohol, (ii) an ether, (iii) an organic ester, (iv) an aldehyde, (v) a ketone, (vi) an inorganic ester, (vii) an acetal, (viii) an epoxide and (ix) a peroxide.

11. The motor fuel composition of claim 1, having at least one of the properties:

(i) density at 20°C of not less than 0.775 g/cm³;

(ii) cloud temperature is not higher than 0°C at atmospheric pressure;

(iii) stable at atmospheric pressure from a cloud temperature of 0°C to an initial boiling point of 50°C;

(iv) amounts of liquid evaporated by boiling at atmospheric pressure include:

- not more than 25% of the total volume of the motor fuel

composition distills at temperatures no higher than 100°C;

- not more than 35 % of the total volume .of the motor fuel

composition distills at temperatures no higher than 150°C;

- not more than 50% of the total volume of motor fuel

composition distills at temperatures no higher than 200°C ;

- not less than 98% of the total volume of the motor fuel

composition distills at temperatures no higher than 400°C, suitably

no higher than 370°C; and preferably no higher than 280°C;

(v) heat of combustion on oxidation by oxygen of not less than 39 MJ/kg;

(vi) self-ignition temperature from 150°C to 300°C; and

(vii) ability to accommodate at least 1% water by volume.

12. The motor fuel composition of claim 11, having at least two of the properties (i) to (iv).

13. The motor fuel composition of claim 11, having the properties (i) to (iv).

14. The motor fuel composition of claim 1, wherein the oxygen-containing component comprises at least one of methanol or ethanol.

15. The motor fuel composition of claim 14, further comprising by-products from production of said methanol or ethanol.

16. The motor fuel composition of claim 1, wherein the oxygen-containing component contains contaminants co-produced or present during production of said oxygen-containing component.

17. The motor fuel composition of claim 1, which is stable at atmospheric pressure over a temperature range from a cloud temperature of -35°C to an initial boiling temperature of 180°C .

18. The motor fuel composition of claim 1, which is stable over a range of temperatures from a cloud point of -50°C to an initial boiling point of 50°C .

19. The motor fuel composition of claim 1, further comprising water in an amount up to about 1% by volume based on the total volume of the motor fuel composition.

1970	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985	1986	1987	1988	1989	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035	2036	2037	2038	2039	2040	2041	2042	2043	2044	2045	2046	2047	2048	2049	2050	2051	2052	2053	2054	2055	2056	2057	2058	2059	2060	2061	2062	2063	2064	2065	2066	2067	2068	2069	2070	2071	2072	2073	2074	2075	2076	2077	2078	2079	2080	2081	2082	2083	2084	2085	2086	2087	2088	2089	2090	2091	2092	2093	2094	2095	2096	2097	2098	2099	2100	

20. The motor fuel composition of claim 1, wherein the oxygen-containing component is formed from a renewable plant resource.
21. The motor fuel composition of claim 1, wherein the hydrocarbon component is a diesel fraction, or a mixture of a diesel fraction and a hydrocarbon fraction lighter than the diesel fraction.
22. The motor fuel composition of claim 1, wherein the hydrocarbon component is a gas oil fraction or a mixture of the gas oil fraction and a hydrocarbon fraction lighter than the gas oil fraction.
23. The motor fuel composition of claim 1, wherein the hydrocarbon component is obtained from renewable resources.
24. The motor fuel composition of claim 23, wherein the renewable resources comprise turpentine and rosin.
25. The motor fuel composition of claim 1, wherein the hydrocarbon component is obtained from a synthesis-gas, a C₁-C₄ gas-containing fraction or a pyrolysis of carbonaceous materials.
26. The motor fuel composition of claim 25, wherein the synthesis-gas is obtained from biomass.
27. The motor fuel composition of claim 25, wherein the pyrolysis of carbonaceous materials comprise biomass or a mixture thereof.

28. The motor fuel composition of claim 1, which has lubricating properties.

29. The motor fuel composition of claim 1, which has a flash point of at least 50°C.

30. A method of preparing the motor fuel composition of claim 1, comprising successively introducing into a fuel reservoir at a constant temperature at least said oxygen-containing component comprising at least two oxygen-containing compounds, beginning with a compound having a lowest density at said temperature and terminating with a compound having a highest density at said temperature.

31. A method of reducing deposits in a combustion chamber of an engine comprising introducing into said combustion chamber a motor fuel composition comprising an oxygen-containing component containing in total at least two oxygen-containing organic compounds, said oxygen-containing organic compounds comprising at least four oxygen-containing functional groups comprising alcohol, ether, aldehyde, ketone, ester, inorganic ester, acetal, epoxide or peroxide, wherein each of said oxygen-containing organic compounds contains at least one of said oxygen-containing groups.
